INDURI AVINASH REDDY

DATA SCIENTIST — MACHINE LEARNING

+91 9346739650 — induriavinashreddy05@gmail.com — Guntur, Andhra Pradesh
GitHub — LinkedIn

PROFESSIONAL SUMMARY

Data Scientist and AI/ML fresher with hands-on experience building end-to-end Machine Learning and Retrieval-Augmented Generation (RAG) solutions using Python, SQL, and Scikit-learn. Skilled in data analysis, statistics, feature engineering, supervised learning, model evaluation, NLP, LLM applications, embeddings, vector search, prompt engineering, LangChain, LlamaIndex, Streamlit deployment, and Power BI reporting.

TECHNICAL SKILLS

Programming: Python, SQL, MySQL

Data Analysis: Pandas, NumPy, EDA, Data Cleaning, ETL, Statistics

Machine Learning: Scikit-learn, XGBoost, Logistic Regression, Random Forest, Feature Engineering, SMOTE, Cross-validation, GridSearchCV

Model Evaluation: ROC-AUC, F1-score, Precision, Recall, Confusion Matrix, Threshold Tuning, SHAP

NLP & GenAI: NLP, TF-IDF, NLTK, Text Classification, LLM, RAG, LangChain, LlamaIndex, Embeddings, Vector Search, ChromaDB, Prompt Engineering

Deep Learning: ANN/DNN, TensorFlow

Visualization & BI: Power BI, DAX, Data Modeling, Matplotlib, Seaborn, Excel

Tools & Platforms: Streamlit, Snowflake, Git, GitHub

PROJECTS

AI Customer Support RAG System GitHub

Built a RAG-based customer support system using LLMs, LangChain, LlamaIndex, embeddings, ChromaDB, and vector search to retrieve relevant knowledge-base context and generate grounded responses. Implemented document ingestion, chunking, retrieval, prompt construction, and Streamlit-based interactive querying.

Customer Churn Prediction System GitHub

Built an end-to-end customer churn prediction pipeline using Python, SQL, EDA, feature engineering, SMOTE, and Scikit-learn; compared Logistic Regression, Random Forest, and XGBoost using cross-validation and threshold tuning. Deployed the prediction solution with Streamlit and Power BI to identify at-risk customers and monitor churn KPIs.

Fraud Detection System GitHub

Built an end-to-end fraud detection pipeline on 50,000 transaction records using Pandas, NumPy, Scikit-learn, feature engineering, and Random Forest. Applied probability threshold tuning to achieve 0.84 ROC-AUC and 0.81 Recall, then deployed interactive fraud prediction with Streamlit and Power BI.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning 2023 – 2027
Chalapathi Institute of Engineering and Technology CGPA: 8.13/10.0

CERTIFICATIONS

Artificial Intelligence Fundamentals – IBM SkillsBuild, 2025
Data Analytics Certification – NPTEL, 2026
